As a lesbian I have nothing in common with a movement that claims men can be lesbians, and is so determined to turn (mostly gay and autistic) kids into lifelong medical patients they drag opponents to court regularly. I want nothing to do with this lunacy.

What is the difference between transgender and transsexual?

Transgender is a non-medical term that has been used increasingly since the 1990s whose gender identity (inner sense of gender) or gender expression (outward performance to which they were assigned at birth). Some people who use this term do not consider themselves in the category of either strictly male or female. In addition, new terms such as gender non-conforming or genderqueer are increasingly in use.
